EXHIBIT 9
Filed Under Seal

1 Mr. Lambourne was proposing to include in the 10:57:04 2 product? 3 MS. BRODY: Objection to form. Outside 4 the scope. 5 THE DEPONENT: Sitting here today, I 10:57:12 6 don't. 7 Q. (By Mr. Kaplan) Was Sonos working on 8 implementing the more grandiose version of -- of 9 Mr. Lambourne's vision during those 15 years? 10 MS. BRODY: Objection to form. And 10:57:41 11 outside the scope. 12 THE DEPONENT: What I recall -- by -- 13 by -- by the time -- you know, we're in the 2006 14 time frame now when I was in an increasingly senior 15 management role. 10:57:59 16 What I recall is that there was a 17 percolating discussion about the -- when -- when 18 the -- sort of the time would be right to introduce 19 the feature and what, you know, scope it would -- 20 it would have. But that -- that's the extent of 10:58:18 21 what I remember, sitting here today. 22 Q. (By Mr. Kaplan) In that 2006 time frame, 23 was Sonos considering adding the more basic version 24 of this idea, which was saving the -- the groups 25 for later use? 10:58:36 Page 62	1 mischaracterization. 11:00:08 2 This -- this idea of zone scenes, in its 3 various incarnations, both grandiose and basic, had 4 been percolating at Sonos for -- for many years. 5 And when I had the opportunity to review what 11:00:23 6 features that we were working on and what features 7 we planned to work on during the -- you know, the 8 coming year in term of implementation, I would 9 raise this with the development team as, you know, 10 why aren't we working on this, you know. Rob has 11:00:48 11 already designed it. We should -- we should ship 12 it. That was the extent of my involvement. 13 Q. Right. 14 And when you were raising this idea of 15 implementing the feature, were you raising the idea 11:00:58 16 of implementing the predefined groups feature or 17 the more grandiose version that we talked about? 18 MS. BRODY: Objection to form. Outside 19 the scope. 20 THE DEPONENT: My -- my -- my best 11:01:19 21 memory, sitting here today, is that I -- it was -- 22 it was probably both, you know. At times I would 23 have said, you know, this is a -- this is an 24 interesting piece of functionality. 25 At other times I would have said, 11:01:38 Page 64
1 A. I don't remember. 10:58:43 2 Q. Do you recall -- I suppose -- strike 3 that. 4 When is the earliest that you recall 5 where Sonos began considering adding the more basic 10:58:53 6 version of -- of the idea, which was saving the 7 groups for later use? 8 MS. BRODY: Objection to form. Outside 9 the scope. 10 THE DEPONENT: Yeah. It's -- it's -- 10:59:08 11 over the -- over this time frame, you know, I -- I 12 went from developing the -- the synchronization 13 software in 2005, to an executive management role, 14 you know, managing hundreds of people. 15 And what I recall is that every so often 10:59:26 16 I would nag our development team about why -- why 17 is this not shipping. But other than that, I don't 18 remember any -- any discussion about, you know, the 19 scope, the feature set, anything along those lines. 20 That was the level of my involvement. 10:59:47 21 Q. (By Mr. Kaplan) You were nagging the 22 development team about the saved groups feature? 23 A. I just -- I -- I think that there's a 24 level of specificity that you're suggesting here 25 which I -- which I think is a -- is a 11:00:05 Page 63	1 you know, there's a relatively basic version of 11:01:40 2 this that -- that, you know, we -- we could ship 3 readily. Why -- why are we not doing that. 4 And so I don't -- I don't think I was 5 specific or consistent in terms of, you know, 11:01:58 6 there's like one vision of this thing that has to 7 be the one. 8 Q. (By Mr. Kaplan) Were there other -- 9 well, strike that. 10 When you were considering adding the 11:02:19 11 feature during this development period, were there 12 other features that were prioritized more highly 13 than adding the -- the saved speaker grouping 14 feature? 15 MS. BRODY: Objection to form. 11:02:31 16 THE DEPONENT: I mean, clearly, the 17 answer at some level is yes, because we shipped 18 other functionality over that time. 19 Q. (By Mr. Kaplan) Can you recall any 20 features that were prioritized more highly than the 11:02:47 21 saved speaker grouping feature? 22 MS. BRODY: Objection to form. Outside 23 the scope. 24 THE DEPONENT: Yeah. I mean, the way -- 25 the way that we've done prioritization is -- has 11:03:00 Page 65

17 (Pages 62 - 65)
